

Storm-Tite®

A innovative cyclonic roofing screw for high wind areas..

One Screw fits most profiles

Is your building prepared for the next wind event?

- ◆ Storm-Tite is a fastener designed for high wind areas throughout Australia and the world.
- ◆ Storm-Tite's superior, sealing EPDM washer provides visual proof of seal (less call backs for installers)
- ◆ Ideal for re-roof applications and storm damaged metal roofs
- ◆ Galvanised with C4 alloy in Australia AS. 3566 Class 4, the best corrosion protection available
- ◆ Passed the 'low - high- low' testing standard.
- ◆ Ideal for Sandwich Roofing Panels
- ◆ Available in all popular colours

**Designed & Made in Australia
for Australian Conditions**

www.actionfasteners.com.au

A unique product from Action Fasteners Pty Ltd an 'Australian Owned Company'

Advantages over traditional fastenings systems

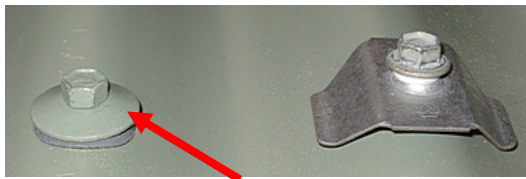

- ◆ Visual proof of seal, unique domed washer molds to form a leak proof seal even if screw is installed off centre
- ◆ One screw fits most profiles
- ◆ Flat –Head for increased corrosion protection
- ◆ Complies to new 'Low - high - low' cyclonic standard
- ◆ Reduce stock levels, one screw fits most profiles
- ◆ Better roof appearance
- ◆ Easier & Faster! One piece metal assembly, No alignment of separate washer required
- ◆ Ideal for re-roof applications/upgrading/cyclone resis-

Disadvantages of traditional fasteners

- ◆ Different roofing profiles require a variety of fasteners
- ◆ Call backs because of leaks
- ◆ Debris could predispose the fastener to corrosion on the head
- ◆ If the screw isn't correctly installed potential for leaking is high
- ◆ Time is wasted lining up the separate washer
- ◆ Inferior coating
- ◆ Shape and height of traditional cyclonic assembly doesn't add to the aesthetics of the roof

Storm-Tite means better 'aesthetic roof appearance'
